

EDUCATION

Sri Eshwar College of Engineering	B.E(EEE)	CGPA:7.5	2023 - 2027
Maharishi Vidya Mandir (CBSE)	HSC	60%	2022 - 2023
Maharishi Vidya Mandir (CBSE)	SSLC	75.4%	2020 - 2021

INTERN

Octanet Services | Web Development 2024

Designed and implemented full-stack web solutions, focusing on real-time updates and seamless backend integration

RV Techlearn Institute | MERN STACK 2025

Gained practical experience in building full-stack web applications with MongoDB, Express.js, ReactJS, and Node.js. Built front-end and back-end development skills through project-oriented hands-on work and practical problem solving

RAMPeX Technologies | Java Full Stack developer (React & SpringBoot) 2025

Built full-stack applications using React for the frontend and Java Spring Boot for the backend. Built RESTful APIs, managed state, and guaranteed secure authentication and role-based access. Integrated MySQL database and built reusable components to make the application efficient.

PROJECTS

RideBuddy – Carpooling & Ridesharing App | FULL STACK 2024

Developed a carpooling and ridesharing application using the MERN stack (MongoDB, Express.js, React.js, Node.js). Built features for creating rides, joining rides, and viewing available trips. Implemented secure user authentication, ride management, and data storage using MongoDB. Designed a clean and responsive React.js frontend that allows users to search rides, view ride details, and book seats smoothly. Created RESTful APIs for all ride operations and tested endpoints using Postman to ensure reliability and seamless functionality.

CampusLink – A Centralized Student Utility Hub | MERN STACK 2025

Created and deployed a MongoDB-powered Restaurant Reservation System with Node.js, emphasizing secure authentication and intuitive browsing. Engineered real-time reservations and streamlined confirmation processes, enhancing user experience. Collaborated cross-functionally to ensure scalability and security, delivering a versatile platform meeting diverse needs.

Product Review Platform | MERN STACK 2025

Developed a product review platform using the MERN stack (MongoDB, Express.js, React.js, Node.js). Built features for users to add product reviews, submit ratings, and view feedback from other users. Designed the frontend using React.js in VS Code, ensuring a clean and responsive UI for browsing products and posting reviews. Implemented RESTful APIs for handling reviews and used MongoDB for secure data storage. Focused on delivering a smooth user experience with structured review management.

TECHNICAL SKILLS

Languages: Java, C, Javascript, Python

Technologies/Frameworks: HTML5, CSS3, MongoDB, React.JS, Node.Js, Express.Js, Bootstrap CSS

Web Developer Tools: VScode, Git, Github, MongoDBCompass, Postman, Canva

Cloud/Databases: MongoDb, Mysql

Core Concepts: Data Structures & Algorithms (DSA), Object Oriented Programming (OOP), Database Management Systems (DBMS)

ACHIEVEMENTS

LEETCODE: 1500+ Rating, Solved 100+ Problems

SKILLRACK: 350+ Problems Solved

CODECHEF: 70+ Problems Solved

CERTIFICATIONS

Mastering Data Structures and Algorithms using C and C++

Learning React

Introduction To Python

Data Structures in C
