

EDUCATION

B.E Electronics and Communication - Sri Eshwar College of Engineering	CGPA: 7.20	2023-2027
HSC – Holy Cross Matriculation Higher Secondary School	76.66	2021-2023
SSLC - Holy Cross Matriculation Higher Secondary School	72.0	2020-2021

PROJECTS

Accessible Voting Machine for Visually Impaired Users

Built using Arduino and ESP8266 with voice recognition module and Braille buttons to enable accessible voting; integrated MP3 module for real-time audio prompts via headphones.

Used a cloud database to securely store votes and implemented voice command technology for hands-free interaction by visually impaired users.

Attendance & IP Tracking System

Developed the java based System to manage attendance and tracking user's IP addresses over a network. The System uses QR code scanner for attendance and collect the user's IP are in the same network OR not and with security.

Implemented under the Java Socket programing to fetch and client IP addresses to track and identify.

Turf Booking System

Developed a full-stack web application using React.js and MongoDB to streamline turf slot booking, user management, and scheduling. Implemented secure user authentication, a responsive UI, and efficient backend APIs to manage real-time slot availability and turf operations.

INTERNSHIPS

MERN – Bettertomorrow

Jan2025

Completed a hands-on internship in MERN stack development at Bettertomorrow, focusing on end-to-end implementation of scalable web applications.

Contributed to real-time project development by designing, coding, and integrating full-stack components using MongoDB, Express.js, React.js, and Node.js.

Cybersecurity Intern – Prompt Engineering

July 2025

Hands-on experience in penetration testing, OSINT, and network security using tools like Nmap, Wireshark, Burp Suite, and Nessus. Conducted scanning, vulnerability assessment, exploitation, and web security testing (XSS, auth bypass, rate-limit checks). Also worked on MITM attacks, port forwarding, Python automation, Linux administration, and network/server enumeration.

Cisco Virtual Internship – Networking & Security

2025

Gained hands-on experience in secure network design, access control, firewall configuration, and load balancing using Cisco Packet Tracer. Implemented security-enabled load balancing with autonomous traffic monitoring and data collection to improve availability and threat mitigation.

SKILLS

Programming Languages: Java (Basic) | **Core Subjects :**Networking & Protocols | Database Management Systems

Full Stack Development: HTML , JavaScript , React.js ,SpringBoot.

Databases: MySQL.

Network Monitoring : Wireshark ,Solarwinds.

Networking Configuration: Static/dynamic IP ,Subnetting.

Networking Skills: Routing & Switching , Loadbalancing ,DNS configuration.

Other Tools: Cisco Packet Tracker , VS Code.
